

10:00 – 12:15 Rights of Mother Earth – A Participatory Workshop

The workshop will open with the screening of powerful videos made by Andean communities of Peru and Igorot communities of Philippines on the 'Rights of Mother Earth'. Together we will discuss this fresh approach to the global environmental crisis. Participants will then be invited to connect with nature in the beautiful grounds around Findhorn and to work in small groups to develop short video responses to the indigenous communities involved. **With Nick Lunch**, Director of Insightshare (<http://insightshare.org>)
